PROFESSIONAL SUMMARY

A motivated Software Developer with over two years of practical experience developing and maintaining web applications using C#, .NET Core, ASP.NET MVC, ASP.NET Web Forms, HTML5, CSS3, JavaScript, and SQL Server. Skilled in designing database-driven applications, developing RESTful APIs, applying object-oriented programming principles, and working with Entity Framework Core, Git, and Agile Scrum methodologies. Experienced throughout the software development lifecycle, including requirements analysis, coding, testing, debugging, deployment, and application support. Complemented by analytical skills in Python, R, and Microsoft Excel for data analysis and reporting, with a strong commitment to writing clean, maintainable code, solving complex technical problems, and continuously learning new technologies to deliver high-quality software solutions.

SKILLS

- **Data Analysis & Visualisation** – Expertise in data manipulation, visualisation using Power BI, Tableau, and R.
- **Database Management & SQL** – Strong knowledge of SQL (DDL, DML, Joins, Subqueries) and MySQL management.
- **ETL/ELT & Data Processing** – Experience in Extract, Transform, Load (ETL/ELT) processes and data modelling.
- **Business Intelligence (BI)** – Hands on experience with Power BI (including DAX functions) for business insights.
- **Version Control & Collaboration** – Proficient in Git and GitHub for version control and project collaboration.
- **Soft Skills & Management** – Strong communication, problem solving, time management, and client relationship skills.
- **Languages and frameworks** – C#, ASP.NET MVC/WebForms, PHP, HTML, CSS & JS.
- **Tools and Concepts** – Visual Studio, Vs Code, AWS EC2, Virtual Machine (VMware), Rest APIs, OOPs & Agile.

WORK EXPERIENCE

Junior Software Developer | IT Skills, London, UK | June 2025-June 2026

- Integrated SQL Server databases with back-end logic, improving query efficiency and overall application performance.
- Developed and maintained ASP.NET Core and MVC web applications using C#, HTML5, CSS3, and JavaScript.
- Designed and produced user interface layouts in Figma to support clear and consistent front-end development.
- Debugged, tested, and optimised applications to ensure stable and reliable system performance.
- Worked collaboratively within Agile sprints, contributing to planning sessions, daily stand ups, and retrospectives.
- Used LINQ and Entity Framework Core to retrieve and manipulate data efficiently.
- Improved page load performance by optimizing SQL queries and reducing unnecessary database calls.

Data Analyst (Internship) | Infotree Consulting LTD, High Wycombe, UK | Aug 2024 – June 2025

- Improved data accuracy by refining, segmenting and validating datasets using SQL, ensuring reliable insights for strategic planning.
- Carried out detailed SQL based data validation and cleansing, strengthening data consistency and reporting accuracy.
- Designed and maintained interactive Power BI dashboards, improving stakeholder engagement and supporting clearer, evidence led decision-making.
- Integrated multiple online and offline data sources, working closely with stakeholders to improve data accessibility and usability.
- Used Talend ETL tools to streamline data pipelines and reduce processing errors

Web Developer | Freelancer

- Designed and developed a hotel management system using PHP, MySQL, HTML, CSS, and Bootstrap to support bookings and staff management.
- Created custom dashboards and data retrieval modules, reducing manual data entry and improving efficiency.
- Implemented responsive and user-friendly interfaces using Bootstrap to enhance usability across devices.

- Deployed the application on AWS EC2, ensuring secure, stable, and reliable hosting.
- Tested and maintained system functionality to support smooth day to day operations.

Other Projects

1. E-Commerce Platform (WordPress):

Developed an e-commerce platform using WordPress, tapping into its robust features and extensive plugin, worked collaboratively with team members to achieve results.

2. Penetration Testing Project (Kali Linux):

Conducted security assessments using Kali Linux and tools like Nmap and Nessus, identifying system vulnerabilities for improving network security protocols.

3. Cloud Computing (AWS / VMware):

Employed VMware virtualisation techniques to operate SUSE Linux, complemented by AWS EC2 instances to enhance scalability and flexibility in cloud computing environments.

4. ERP System Development (C# / ASP.NET):

Developed a comprehensive ERP system for stock control using ASP.NET Core and C#, improving client inventory management through waterfall methodology. Emphasized a user-friendly interface and implemented SQL Server to ensure efficient data handling.

Machine Learning Projects:

1. Taxi Fare Prediction:

- Refined a successful taxi fare prediction project using artificial neural networks (ANN) with TensorFlow and Keras, achieving high accuracy in the predictions.

2. Predicting Cancer Malignant or Benign:

- Utilised the Decision Tree Classifier to achieve a 90.4% accuracy in a cancer prediction project, which was further enhanced to 98% accuracy by implementing the XGBOOST Classifier, highlighting its superior predictive capabilities.

Power BI Projects Store

Sales Dashboard

- Performed data cleaning to handle missing values, remove duplicates, and standardise formats, improving data accuracy by 25%, which resulted in more reliable and actionable insights for decision making,

Supply Chain Dashboard

- Boosted a dashboard with Gantt charts, heat maps, and stacked bar charts, improving delivery efficiency by 20% and reducing supply chain disruptions by 15%.
- Added slicers and drill down functionality, increasing data accessibility and decision-making speed by 30%.

EDUCATION

Sep 2021 - Jul 2024 | **Bachelors in Science (Hons) in IT** | University of Hertfordshire
